

POCKETSMART AI

Project Demonstration

1. Introduction

The project demonstration presents the complete workflow of PocketSmart AI from user registration to AI-generated results.

2. Demonstration Flow

The demonstration begins with opening the PocketSmart AI application. The user registers or logs into the application and accesses the planner.

The user enters the available budget and selects the required room and preferred style. The user then enters the required items and selects the Generate Plan button.

The application processes the input and sends the required information to the Generative AI service. The generated response is then returned to the application and displayed to the user.

3. Demonstration Steps

Step 1: Open PocketSmart AI.

Step 2: Register a new account or log in.

Step 3: Open the Home Planner.

Step 4: Enter the available budget.

Step 5: Select the room.

Step 6: Select the preferred style.

Step 7: Enter the required items.

Step 8: Select Generate Plan.

Step 9: Wait for the AI service to process the request.

Step 10: View the generated plan and recommendations.

4. Screenshots

Insert the screenshots of each important step in this section.

5. Live Demo

The deployed PocketSmart AI application can be accessed using the live demo link provided in the project repository.

6. Conclusion

The demonstration shows the complete working flow of PocketSmart AI and explains how the application uses Generative AI to provide personalized planning assistance.
